

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY

CONSOLIDATED FINANCIAL STATEMENTS

For the year ended

30 June 2020

I am responsible for the preparation of these financial statements, which are set out on pages 1 to 103, in terms of section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors, as disclosed in note 25 of these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Cooperative Governance and Traditional Affairs' determination in accordance with the Act.

Mr. M. George
(Master's Degree in Development Studies
ND: Cost and Management Accounting)

30 November 2020

Acting City Manager

**NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
CONSOLIDATED FINANCIAL STATEMENTS AS AT 30 JUNE 2020**

Auditors	Auditor-General (SA)
Physical Address of Auditors	69 Frere Road Vincent East London 5247
Postal Address of Auditors	P O Box 13252 East London 5217

1. BASIS OF PREPARATION AND STATEMENT OF COMPLIANCE

These Consolidated Financial Statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act (Act No 56 of 2003). In addition, these Consolidated Financial Statements include mandatory disclosures in accordance with the Municipal Finance Management Act (Act No 56 of 2003) and related regulations.

The Consolidated Financial Statements are prepared on the accrual basis of accounting and the transactions, assets and liabilities included in the financial statements are measured at historical cost unless specified otherwise.

With respect to accounting standards for material transactions, events or conditions not covered by Directive 5, the Economic Entity has developed accounting policies in accordance with paragraphs 8, 10 and 11 of GRAP 3, as read with Directive 5.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's Consolidated Financial Statements, unless explicitly stated.

New standards now effective but not yet implemented:

Standard number	Standard name	Effective date from (if applicable)
GRAP 18	Segment Reporting	01 April 2020

GRAP 18 – Segment Reporting

The objective of this standard is to establish principles for reporting financial information by segments. It is expected that adoption of this standard will result in additional disclosures.

1.1 CONSOLIDATED FINANCIAL STATEMENTS

The Economic Entity's financial statements incorporate the financial statements of the parent entity, Nelson Mandela Bay Municipality and all its municipal entities, presented as a single entity and consolidated at the same reporting date as the parent entity.

The controlled entities have the same reporting date and reporting period as the controlling entity.

All inter-entity transactions and balances, unrealised gains and losses within the Economic Entity are eliminated upon consolidation. Where appropriate, the accounting policies of controlled entities conform to the policies adopted by the Economic Entity.

1.2 MUNICIPAL ENTITIES

Municipal entities are all controlled entities over which the Economic Entity has ownership control or effective control to govern the financial and operating policies of such controlled entities to benefit from its activities.

2. PRESENTATION AND FUNCTIONAL CURRENCY

These Consolidated Financial Statements are presented in South African Rand.

The functional currency of the Economic Entity is South African Rand. Financial values are rounded to the nearest one Rand.

3. GOING CONCERN ASSUMPTION

These Consolidated Financial Statements have been prepared on a going concern basis.

4. COMPARATIVE INFORMATION

4.1 Current year comparatives (Budget):

In accordance with GRAP 1 and 24, the Budget information has been presented on the face of the Statement of Financial Performance in these Consolidated Financial Statements.

4.2 Prior year comparatives:

When the presentation or classification of items in the Consolidated Financial Statements are amended, prior period comparative amounts are reclassified and restated. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

Where there has been a change in accounting policy in the current year and the standards require retrospective adjustment, the adjustment is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

The nature and reasons for the reclassifications and restatements are disclosed in Note 40 to the Consolidated Financial Statements.

5. STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

STANDARDS

The following revised and newly approved Standards of GRAP have been approved and issued by the Accounting Standards Board but only become effective in the future or have not been given an effective date by the Minister of Finance. The Economic Entity has not early-adopted any new Standards or revised Standards of GRAP but has in some cases referred to them for guidance in developing appropriate accounting policies in accordance with the requirements of Directive 5: Determining the GRAP Reporting Framework.

Standard number	Standard name	Effective date (if applicable)
GRAP 34	Separate Financial Statements	No effective date
GRAP 35	Consolidated Financial Statements	No effective date
GRAP 36	Investments in Associates and Joint Ventures	No effective date
GRAP 37	Joint Arrangements	No effective date
GRAP 38	Disclosure of Interests in Other Entities	No effective date
GRAP 110	Living and Non-living Resources	No effective date

GRAP 34 - Separate Financial Statements

The objective of this Standard is to prescribe the accounting and disclosure requirements for investments in controlled entities, joint ventures and associates when an entity prepares separate financial statements.

GRAP 35 – Consolidated Financial Statements

The objective of this Standard is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

GRAP 36 - Investments in Associates and Joint Ventures

The objective of this Standard is to establish principles for the presentation and preparation of consolidated financial statements when an entity has an investment in one or more other entities. It is expected that adoption of this standard will not be significant.

GRAP 37 - Joint Arrangements

The objective of this Standard is to establish principles for the presentation and preparation of consolidated financial statements when an entity has an investment in one or more other entities. It is expected that adoption of this standard will not be significant.

GRAP 38 - Disclosure of Interests in Other Entities

The objective of this Standard is to require an entity to disclose information that enables users of its financial statements to evaluate:

- (a) the nature of, and risks associated with, its interests in controlled entities, unconsolidated controlled entities, joint arrangements and associates, and structured entities that are not consolidated; and
- (b) the effects of those interests on its financial position, financial performance and cash flows.

GRAP 110 - Living and Non-living Resources

This standard deals with living resources that undergo biological transformation and non-living resources that occur naturally and have not been extracted. It is expected that this standard will not be applicable to the Municipality, as we are not dealing with these resources currently.

6. SIGNIFICANT JUDGEMENTS

The use of judgement, estimates and assumptions is inherent to the process of preparing consolidated financial statements. These judgements affect the amounts presented in the consolidated financial statements. Uncertainties about these estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of the relevant asset or liability in future periods.

Management has made the following significant judgements:

Heritage Assets

Where an asset is acquired by the Economic Entity for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an asset is acquired in exchange for a similar asset, the acquired asset is initially measured at the carrying value of the asset given up.

Where an asset is acquired in exchange for a dissimilar asset, the acquired item is initially measured at the fair value (the cost). If the acquired item's fair value is not determinable, the allocated deemed cost is the carrying amount of the asset given up.

Revenue from Exchange transactions

Revenue from the sale of electricity prepaid meter cards is recognised at point of sale.

Allowance for Credit losses

On Consumer Debtors, an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the estimated future cash flows based on the historical payment trend.

Other key judgements

Provisions and contingent liabilities

Management judgement is required when disclosing and measuring provisions and contingent liabilities. Provisions have been discounted where the effect of discounting is material. Refer to accounting policy Note 11.

Operating lease commitments – the Economic Entity as lessor

The Economic Entity has entered into commercial property leases on its investment property portfolio. The Economic Entity has determined that it retains all the significant risks and rewards of ownership of these properties and therefore has continued to recognise the investment properties.

Management's Going Concern Assessment:

Management considered the following matters relating to the Going Concern:

On 30 May 2019, the Council adopted the 2019/20 to 2021/22 Budget. This three-year Medium Term Revenue and Expenditure Framework (MTREF) to support the on-going delivery of municipal services to residents reflected that the Budget was funded over the three-year period.

Management has thus prepared the Consolidated Financial Statements on the Going Concern basis.

7. SIGNIFICANT ESTIMATES AND ASSUMPTIONS

In the process of preparing the Economic Entity's Consolidated Financial Statements, management has made the following key estimates and assumptions:

Presentation of a comparison of budget and actual amounts

The Economic Entity presents a comparison of the budget amounts for which it is held publicly accountable and actual amounts as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP24. The comparison of budget and actual amounts present separately for each level of legislative oversight.

Provision for Rehabilitation of Refuse Landfill Sites

The Economic Entity has an obligation to rehabilitate its landfill sites in terms of its license stipulations. Provision is made for this obligation based on the net present value of cost to rehabilitate the landfill sites in the future. The cost factors, as determined, have been applied and projected at an inflation rate of 2.2% (2019: 4.5%) and discounted to the present value:

- a) For Arlington and Koedoeskloof landfill sites, at the average short term borrowing cost of 11.14% (2019: 11.14%).
- b) The determined cost to rehabilitate IBhayi landfill site represents the present value.

Provision for Rehabilitation of Swartkops River

The provision is in relation to the Economic Entity's obligation to address the environmental pollution of the Swartkops River. The provision is based on the estimated costs to carry out the rehabilitation work of the wetland beside the Swartkops River, which was present valued at a rate of 11.14% (2019: 11.14%). The discount rate of 11.14% represents the Economic Entity's average borrowing costs rate and is applied as a discount rate.

Pension and other post-employment benefits

The cost of defined benefit pension plans (ex gratia pensions), other post-employment medical benefits, and the present value of the pension obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. For key assumptions, refer to Note 47 of the Consolidated Financial Statements.

Provision for gratuity pensions

Employees that were employed prior to the introduction of the Port Elizabeth Municipal Pension Benefit Fund and who subsequently joined the fund are eligible to be paid a standard gratuity, provided they have at least 10 years of service when they retire.

Employees that were employed prior to the introduction of the Port Elizabeth Municipal Pension Benefit Fund and who chose not to join the fund are eligible to be paid an Enhanced Gratuity for the years of service that they were not a member of the fund.

If an Employee eligible for a Gratuity Pension dies in service, half of the Gratuity Pension (including the monetary enhancement) as calculated at date of death, is paid.

Property, plant and equipment including Investment Properties and Intangible Assets

The useful life of assets are based on management's estimation. Management consider the impact of technology, availability of capital funding, service requirements and required return on assets in order to determine the optimum useful life expectation, where appropriate.

The Economic Entity maintains and acquires assets to provide a social service to the community, with no intention of disposing of the assets for any economic gain and thus residual values are determined to be nil for all assets.

Water inventory

The estimation of the water stock in the reservoirs are based on the measurement of water via electronic level sensors, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir. Refer to accounting policy Note 17.

Amounts due to Funders of Construction Contracts

This represents the total value of unspent conditional grant funding that have been received by the Entity and which is reflected as payable to the funders of construction contracts and other capital projects.

8. HOUSING DEVELOPMENT FUND

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the Economic Entity were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes both complete and in progress as at 1 April 1998, were transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

The Housing Development Fund is included as one of the reserves within Accumulated Surplus.

The housing function has now been handed over to the Housing Development Agency.

9. ACCUMULATED FUNDS

The Economic Entity maintains various internal reserves in terms of specific requirements, which include:

- Capital Replacement Reserve (CRR): Internal reserve administered within the Accumulated Surplus for control purposes
- Capitalisation Reserve (CR): Internal reserve administered within the Accumulated Surplus for control purposes
- Donations and Public Contributions Reserve: Internal reserve administered within the Accumulated Surplus for control purposes
- Self-Insurance Reserve: Internal reserve administered within the Accumulated Surplus for control purposes.
- Government Grant Reserve: Internal reserve administered within the Accumulated Surplus for control purposes.
- Compensation for Occupational Injuries and Diseases (COID) Reserve

The Economic Entity has been exempted from making contributions to the Compensation Commissioner for Occupational Injuries and Diseases in terms of Section 84 of the COID Act, but is required to maintain a reserve of R10 million. This reserve is subject to annual review by the Commissioner.

The certificate of exemption issued by the Commissioner and as prescribed by the Compensation for Occupational Injuries and Diseases Act (No. 130 of 1993), requires that the Economic Entity deposit cash and/or securities relating to COID with the Commissioner. The combined market values shall not be less than the capitalised value of the continuing liability of the Economic Entity as at 31 December of each year.

The continuing liability is that of pensions, with the capitalised value being determined based on an actuarial determination as prescribed by the Commissioner. A COID reserve has been established to be equal to or greater than the value of the continuing liability. The Commissioner determines the market value of the securities annually and the Economic Entity is required to meet any shortfall in the aggregate value of the securities as at 31 December.

Monthly pensions are funded by allocating funds out of the COID portion of Accumulated Surplus to general Accumulated Surplus (refer to note 2).

10. EMPLOYEE BENEFITS

Recognition and measurement

Short term employee benefits

Remuneration to employees is recognised as an expense in the Statement of Financial Performance as services are rendered, except for non-accumulating benefits, which are recognised when the specific event occurs.

The costs of all short-term employee benefits, such as leave pay, are recognised in the period the employee renders the related service.

Short-term employee benefits are measured on an undiscounted basis.

Short term compensated absences

The expected cost of compensated absences is recognised as follows:

Accumulating compensated absence:

When employees render services that increase their entitlement to future compensated absences; and

Non-accumulating absences:

When absences occur.

Leave pay accrual

The liability for accumulating compensated absences is based on the total amount of leave days accumulated by employees at reporting date and on the total remuneration package of the employees.

Bonus incentive and performance related payments

The Economic Entity recognises the expected cost of performance bonus when, and only when, it has a present legal or constructive obligation to make such payments, as a result of past events and a reliable estimate of the obligation can be made.

A provision in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees is raised once the timing and amount of such provision can be reliably determined. The provision is based on the performance of each S57 employee against the performance scorecard set and agreed upon for each financial year. If on assessment of the respective S57 employees it is decided that a bonus will be paid out, the S57 employee is entitled to receive this bonus irrespective of whether they are still in the service of the Economic Entity, or not.

Post-employment benefits

Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans. The cost of providing benefits under the defined benefit plans is determined separately for each plan, using the projected unit credit method. Actuarial valuations are conducted on an annual basis for each plan. In the event that an independent actuarial valuation is not performed, Management will assess whether the assumptions used in the previous valuation remain applicable. If so, the valuation will be based on the previous independent valuation. If not, an adjustment is made to take into account any changes in assumptions.

Recognition and measurement

The actuarial gains or losses are recognised in the Statement of Financial Performance in the year incurred.

The past service costs are recognised as an expense immediately.

The defined benefit asset or liability comprises the present value of the defined benefit obligation (further detail is available in Note 47), less the fair value of plan assets out of which the obligations are to be settled. Plan assets are assets that are held by long-term employee benefit funds or qualifying insurance policies. Plan assets are not available to the creditors of the Economic Entity nor can they be paid directly to the Economic Entity.

Fair value is based on market price information and in the case of quoted securities; it is the published bid price. It should be noted that there are currently no plan assets.

Medical Aid: Continued Members

The Economic Entity provides post-retirement benefits by subsidising the medical aid contributions of certain retired staff. According to the rules of the Medical Aid Funds with which the Economic Entity is associated, a member, on retirement, is entitled to remain a continued member of such medical aid fund. Should the member opt to remain on the fund, the member is liable for the portion, as determined by Council from time to time, of the medical aid membership fee and the Economic Entity for the remaining portion.

These contributions are charged to the Statement of Financial Performance when employees have rendered the service entitling them to the contribution.

The liability in respect of current pensioners is regarded as fully accrued and is therefore not split between a past (or accrued) and future in-service element. The liability is recognised at the fair value of the obligation.

The actuarial gains or losses are recognised in the Statement of Financial Performance in the year incurred. Actuarial valuations are conducted on an annual basis for each plan. In the event that an independent actuarial valuation is not performed, Management will assess whether the assumptions used in the previous valuation remain applicable. If so, the valuation will be based on the previous independent valuation. If not, an adjustment is made to take into account any changes in assumptions.

Gratuity Provision

A provision in respect of the liability relating to gratuities payable to employees that were not previously members of a pension fund, is maintained. The gratuity is payable by Council to wage earners who joined the Economic Entity before 1988. The Council decided to make gratuity payments to these employees upon retirement. The amount payable is based on the individual employee wage rate and the number of years in service until the employee joined a pension fund. The provision is determined with reference to minimum wage rate applicable immediately prior to joining the pension fund multiplied by number of years' service and adjusted annually based on the average interest earned on investments.

Long service awards

Employees who have completed 25 years unbroken service are entitled to receive a once-off cash award not exceeding R2 500. The cash award is included in the employee's salary in the month of the service anniversary.

Defined contribution plans:

The Economic Entity has used GRAP 25 as guidance for treatment of multi-employer plans as sufficient information was not available to use defined-benefit accounting. The Economic Entity has therefore accounted for the Cape Joint Pension Fund and the SALA Pension Fund as defined contribution plans. It is impracticable to disclose as a defined benefit plan because the funds do not determine a separate actuarial valuation per Economic Entity but do it as a whole for all the Municipalities together.

Retirement benefits

The Economic Entity provides retirement benefits for its employees and councillors.

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions, if the fund does not hold sufficient assets to pay all employee benefits relating to

employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

11. PROVISIONS AND CONTINGENCIES

Provisions are recognised when the Economic Entity has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision shall be the best estimate of the expenditure required to settle the present obligation at the reporting date (for example in the case of obligations for the rehabilitation of land). The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost. The discount rate is a pre-tax rate that reflect the current market assessments of the time value of money. No re-imbursements are expected from another party in the current financial year.

If the effect of the time value of money is material, provisions are discounted using a rate that reflects the risk of the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that there will be an outflow of resources embodying economic benefits or service potential to settle the obligation, the provision is reversed.

Future events that may affect the amount required to settle an obligation are reflected in the provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

With respect to litigation and claims against the Economic Entity, the Economic Entity's Legal Counsel assesses the list of claims against the Economic Entity on an annual basis. The Economic Entity recognises a provision for all claims/cases for which the outflow of economic resources is probable and the amount can be reliably estimated.

The Economic Entity does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

12. FINANCIAL INSTRUMENTS

Initial Recognition

The Municipality recognises a financial asset or a financial liability in its Statement of Financial Position when, and only when, the Economic Entity becomes a party to the contractual provisions of the instrument.

The Economic Entity recognises financial assets using trade date accounting.

Distinguishing liabilities and residual interests

A financial instrument or its component parts is classified on initial recognition as a financial liability, a financial asset or residual interest in accordance with the substance of the contractual arrangement and the definitions of a financial liability, a financial asset and a residual interest.

Compound financial instruments

The Economic Entity evaluates the terms of a financial instrument to determine whether it contains both a liability and residual interest component. Such components are classified separately as financial liabilities or residual interests.

Initial Measurement of financial assets and financial liabilities

When a financial asset or financial liability is recognised initially, the Economic Entity measures it at its fair value plus, in the case of a financial asset or a financial liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The transaction price usually equals the fair value at initial recognition, except in certain circumstances, for example where interest free credit is granted or where credit is granted at a below market rate of interest.

Concessionary loans

The Economic Entity first assesses whether the substance of a concessionary loan meets the definition of a financial instrument. On initial recognition, the Economic Entity analyses a concessionary loan into its component parts and accounts for each component separately. The Economic Entity accounts for that part of a concessionary loan that is:

- a) A social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- b) Non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

The part of the concessionary loan that is a social benefit or non-exchange revenue is determined as the difference between the fair value of the loan and the loan proceeds, either paid or received.

After initial recognition, an entity measures concessionary loans in accordance with the subsequent measurement criteria set out for all financial instruments. Concessionary Loans were not granted or received during the current financial year. There were no defaults relating to any loans payable for the current financial year

Subsequent Measurement of financial assets and financial liabilities

Subsequent to initial recognition, financial assets and financial liabilities are measured at fair value, amortised cost or cost.

All financial assets and financial liabilities are measured after initial recognition using the following categories:

- a) Financial instruments at fair value
 - Instruments held for trading.
 - Non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition.
 - Financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.
- b) Financial instruments at amortised cost
 - Non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that the Economic Entity designates at fair value at initial recognition or are held for trading.
- c) Financial instruments at cost
 - Investments in residual interests that do not have a quoted market price in an active market and whose fair value cannot be reliably measured.

The Economic Entity assesses which instruments should be subsequently measured at fair value, amortised cost or cost, based on the definitions of financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost as set out above.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Embedded derivatives were not applicable for the current financial year.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired or through the amortisation process.

Impairment of financial assets

All financial assets measured at amortised cost, or cost, are subject to an impairment review. The Economic Entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

The Economic Entity first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If an entity determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal may not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition of financial assets:

The Economic Entity derecognises financial assets using trade date accounting.

The Economic Entity derecognises a financial asset only when:

- a) The contractual right to the cash flow from the financial asset expire, are settled or waived;
- b) The Economic Entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- c) Despite having retained significant risks and rewards, the entity has transferred control of the asset to another party.

Derecognition of financial liabilities:

The Economic Entity derecognises a financial liability from its statement of financial position when it is extinguished, that is, when the obligation specified in the contract is discharged, cancelled, expires or waived.

Presentation:

Interest, losses and gains

Interest, losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit

Offsetting a financial asset and a financial liability

The Economic Entity does not offset financial assets and financial liabilities in the Statement of Financial Position unless a legal right to set-off exists and the parties intend to settle on a net basis or to realise the asset and settle the liability simultaneously.

Policies relating to specific financial instruments

Investments at amortised cost

Investments, which include fixed deposits and short-term deposits invested in registered commercial banks, are categorised as financial instruments at amortised cost and are subsequently measured at amortised cost, using effective interest method.

Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is recognised in the Statement of Financial Performance.

Investments at fair value

Investments, which represent investments in equity for which fair value can be measured reliably, are subsequently measured at fair value. The fair value is based on market values at valuation date.

Gains and losses in the fair value of such investments are recognised in the Statement of Financial Performance.

Cash and cash equivalents

Cash and cash equivalents are measured at amortised cost.

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprises of cash on hand and deposits held on call with banks.

Trade and other receivables including Statutory Receivables

Trade and other receivables are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition and subsequently stated at amortised cost, less provision for impairment. Amounts that are receivable within 12 months from the reporting date are classified as current. Interest is charged on overdue accounts.

Bad debts are written off in the year in which they are identified as irrecoverable, subject to the approval of the Council.

Trade and other payables

Trade payables are initially measured at fair value plus transaction costs that are directly attributable to the acquisition and are subsequently measured at amortised cost using the effective interest method.

13. PROPERTY, PLANT AND EQUIPMENT

Initial recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, other than investment property, or for administrative purposes and are expected to be used during more than one year.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the Economic Entity and the cost or fair value of the item can be measured reliably.

There are no circumstances, which we are aware off, where NMBM is not the legal owner / custodian but controls the land and vice versa.

Measurement at recognition

Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. Where an asset is acquired by the Economic Entity for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Economic Entity. The cost also includes the initial estimate of the costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an item of property, plant and equipment is acquired in exchange for a similar asset, the acquired asset is initially measured at the carrying value of the asset given up.

Where an item of property, plant and equipment is acquired in exchange for a dissimilar asset, the acquired item is initially measured at the fair value (the cost). If the acquired item's fair value is not determinable, the allocated deemed cost is the carrying amount of the asset given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the Economic Entity expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with a specific item of property, plant and equipment, they are accounted for as property, plant and equipment.

Subsequent measurement

Subsequent to initial recognition, items of property, plant and equipment (other than land) are measured at cost less accumulated depreciation and impairment losses.

Subsequent to initial recognition, land is measured at cost and is not depreciated because it has an indefinite useful life.

Where the Economic Entity replaces parts of an asset, it derecognises the part of the asset replaced and capitalises the new component.

Subsequent expenditure including major spare parts and servicing equipment qualify as property, plant and equipment if the recognition criteria are met.

Depreciation

Depreciation is calculated on the depreciable amount, using the net book value over the remaining useful life of the component assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

The component assets' residual values, useful lives and depreciation methods are reviewed at each financial year-end and if expectations differ from previous estimates, the changes are accounted for as a change in estimate in accordance with the standard of GRAP on accounting policies, changes in accounting estimates and errors.

The depreciation charge for each reporting period is recognised in surplus or deficit, unless it is included in the carrying amount of another asset.

The annual depreciation rates for the current and previous year are based on the following average asset useful lives:

Land & Buildings	Useful Life Range in Years
Buildings / Leasehold Assets	5 - 50
Land	Indefinite Life
Infrastructure Assets	Useful Life Range in Years
Fencing, Roads, Sidewalks & Stormwater Networks	5 – 100
Beach Developments	30 – 50
Electricity Reticulation & Supply	10 – 80
Sewerage Mains & Purification Works	15 – 80
Waste Disposal Facilities	20 – 100
Water Supply & Reticulation	10 – 50
Dams & Treatment Works	25 – 100
Other Assets	Useful Life Range in Years
Bins & Containers	5 – 15
Air Monitoring, Emergency & Medical Equipment	5 – 20
Vehicles & Plant	4 – 30
Office Furniture & Fittings	3 – 20
Landfill Sites	50
Security Systems	5 – 15
Tip Sites	30
Computer Hardware	3 – 8

Community Assets	Useful Life Range in Years
Libraries	15 – 50
Fire Stations	15 – 50
Library Books	5 – 20

Cemeteries	15 – 50
Clinics	15 – 50
Community Centres	15 – 50
Public Conveniences	15 – 50
Swimming Pools	15 – 50
Recreational Facilities	15 – 50
Selling & Letting Schemes	15 – 50

Impairment:

Recognition and measurement of an impairment loss for an item of property, plant and equipment

An entity shall assess at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the entity shall estimate the recoverable amount of the asset.

The carrying amount of an asset is reduced to its recoverable amount if, and only if, its recoverable amount is less than its carrying amount.

The impairment loss is recognised immediately in surplus and deficit.

Derecognition

The carrying amount of an item of property, plant and equipment is derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance. Residual values are assumed to be zero, unless otherwise stated.

14. HERITAGE ASSETS

Initial recognition and measurement

Heritage assets are assets that have cultural, historical, environmental, natural, scientific or technological significance that are held indefinitely for the benefit of present and future generations.

Heritage assets are recognised when it is probable that future economic benefits or service potential associated with the item will flow to the Economic Entity and the cost or fair value of the item can be measured reliably.

When an asset, does not meet the initial recognition criteria of a heritage asset, the Economic Entity discloses the relevant and useful information about such assets in the notes to the financial statements.

Heritage assets are initially recognised at cost on acquisition date.

The cost is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Economic Entity.

Where an asset is acquired by the Economic Entity for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an asset is acquired in exchange for a similar asset, the acquired asset is initially measured at the carrying value of the asset given up.

Where an asset is acquired in exchange for a dissimilar asset, the acquired item is initially measured at the fair value (the cost). If the acquired item's fair value is not determinable, the allocated deemed cost is the carrying amount of the asset given up.

Subsequent measurement

Subsequent to initial recognition, the Economic Entity uses the cost model to measure its heritage assets.

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

The entire heritage assets disclosed are being used as a heritage asset. No initial costs incurred to assess the heritage asset. No compensation is due for Heritage Assets impaired, lost or given up.

The table below reflects the class of heritage assets and the estimated useful life range in years:

Heritage Sites	Useful Life Range in Years
Memorials & Statues	Indefinite Life
Heritage Sites	Indefinite Life
Museums	Indefinite Life
Art Works	Indefinite Life
Collections of rare books and manuscripts	Indefinite Life

Impairment

The Economic Entity does not depreciate its heritage assets, but at each financial year end, it assesses whether there is an indication that the assets may be impaired. If such an indication exists, the Economic Entity estimates the recoverable amount or the recoverable service amount of the heritage asset.

Derecognition

Heritage assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of a heritage asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

15. INTANGIBLE ASSETS

Initial recognition and measurement

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences and development costs. The Economic Entity recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the Economic Entity and the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the Economic Entity for no or nominal consideration (i.e. a non-exchange transaction), its initial cost at the date of acquisition is measured at its fair value as the date of acquisition.

Intangible assets acquired through non-exchange transactions:

Internally generated intangible assets:

Research phase

The Economic Entity does not recognise any intangible asset arising from a research phase of an internal project. Expenditure on research phase of an internal project is recognised as an expense when incurred. No research and development expenditure was recognised as an expense during the period.

Development phase

An intangible asset arising from development phase is recognised if, and only if the Economic Entity can demonstrate all of the following:

- a) The technical feasibility of completing the intangible asset so it will be available for use or resale;
- b) Its intention to complete the intangible asset and use it or sell it;
- c) Its ability to use or sell the intangible asset;
- d) How the intangible asset will generate probable future economic benefits or service potential;
- e) The availability of technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- f) Its ability to measure reliably the expenditure attributable to the intangible asset during its development.

Exchanges of assets

The cost of an intangible asset acquired in exchange for another is measured at fair value unless the fair value of neither the asset received nor the asset given up is reliably measurable. If the acquired asset is not measured at fair value, its cost is measured at the carrying amount of the asset given up.

Subsequent measurement

Intangible assets are subsequently carried at cost less accumulated amortisation and impairment losses.

The cost of an intangible asset is amortised over its useful life where that useful life is finite. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Financial Performance in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are not amortised but are tested for impairment annually, and whenever there is an indication that the intangible asset may be impaired, either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis. The probability of expected future economic benefits or serviced potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset are assessed at each reporting date.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Amortisation and impairment

Amortisation is charged to write off the net book value of intangible assets over their remaining useful lives. Amortisation of an asset begins when it is available for use.

The annual amortisation rates are based on the following estimated average asset useful lives:

Intangible	Useful Life Range in Years
Computer Software	3 – 5
Website Development	3 – 5

The amortisation period, the amortisation method and residual value for intangible assets with finite useful lives are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

Derecognition

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

16. INVESTMENT PROPERTY

Initial recognition and measurement

Investment property includes property (land or a building or part of a building or both land or buildings held by owner or by a lessee under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services or the sale of an asset in the ordinary course of operations.

Investment property is initially recognised as an asset when, and only when, it is probable that future economic benefits and or service potential will flow to the Economic Entity and the cost or fair value can be measured reliably.

At initial recognition, the Economic Entity measures investment property at cost including transaction costs once it meets the definition of investment property.

Where an investment property was acquired through a non-exchange transaction (i.e. where the Economic Entity acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

Transfers are made to or from investment property only when there is a change in use. If owner occupied property becomes an investment property, the Economic Entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. If investment property becomes owner-occupied property, the Economic Entity accounts for such property in accordance with the policy stated under investment property up to the date of change in use. The costs of day-to-day servicing of investment properties are recognised in the Statement of Financial Performance as incurred.

There are no circumstances, which we are aware off, where NMBM is not the legal owner / custodian but controls the land and vice versa.

Subsequent measurement

Investment property is measured using the cost model. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation

Depreciation begins when the asset is available for use. Depreciation is calculated on the depreciable amount, using the net book value over the remaining useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Investment Property	Useful Life Range in Years
Land Buildings	Indefinite Life 15 - 50

The investment property's residual values, useful lives and depreciation methods are reviewed and adjusted if appropriate, at each financial year-end.

Land is not depreciated.

Fair Value

The assumptions for determining the fair value of the investment property is set out in Note 12 of the Consolidated Financial Statements.

Derecognition

Investment property is derecognised when it is disposed of or when no future economic benefits or service potential are to be derived from the use of the asset. All gains or losses from the disposal of investment property are determined as the difference between the sales proceeds and the carrying value of the asset and are recognised in the Statement of Financial Performance.

17. INVENTORIES

Initial recognition and measurement

Inventories comprise assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes (other than VAT), transport costs and any other direct costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the Economic Entity for no or nominal consideration (i.e. a non-exchange transaction), the cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Inventories, consisting of consumable stores, raw materials, water and finished goods (FG), are measured at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. The basis of determining cost is first-in, first-out (FIFO) method for all inventory categories except water. Water is measured on the weighted average method.

Redundant and slow-moving inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values.

An impairment provision for the write down of inventory is maintained in lieu of obsolete inventory. The level of the impairment provision for obsolete inventory is the value equivalent to the value of inventory assessed as obsolete at financial year-end.

Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

The Economic Entity purchases its water. The cost of water purchased and not yet sold as reflected in the statement of financial position comprises the purchase price and other direct costs attributable to the acquisition. The estimation of the water stock in the reservoirs is based on the measurement of water via electronic level sensors, which determine the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir. There are no items not ordinarily inter-changeable / segregated for specific projects.

18. IMPAIRMENT OF NON-CASH-GENERATING ASSETS

Recognition

The Economic Entity assesses at each reporting date whether there is an indication that an asset may be impaired. Where any such indication exists, the Economic Entity estimates the recoverable service amount of the asset. Where the carrying amount of an asset exceeds its recoverable amount (or recoverable service amount in the case of non-cash-generating assets), the asset is considered impaired and is written down to its recoverable amount (or recoverable service amount). An asset's recoverable amount (or recoverable service amount) is the higher of the fair value less costs to sell, and the value-in-use of the asset.

The Economic Entity classifies the asset/identifiable group of assets as cash-generating if the key purpose of such asset/group of assets is to derive a commercial return from continuing use, and are independent of the cash inflows from other assets or groups of assets. The Economic Entity will classify all other assets that do not meet the definition of cash-generating assets/group of assets as non-cash generating assets.

Measurement

An asset's recoverable amount (or recoverable service amount) is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value-in-use. This recoverable amount (or recoverable service amount) is determined for individual assets, unless those individual assets are part of a larger cash-generating unit, in which case the recoverable amount (or recoverable service amount) is determined for the whole cash-generating unit.

An asset is part of a cash-generating unit where that asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

In determining the recoverable amount (or recoverable service amount) of an asset the entity evaluates the assets to determine whether the assets are cash generating assets or non-cash generating assets.

For cash generating assets, the value in use is determined as a function of the discounted future cash flows from the asset.

Where the asset is a non-cash generating asset, the value in use is determined through one of the following approaches:

- Depreciated replacement cost approach: The current replacement cost of the asset is used as the basis for this value. This current replacement cost is depreciated for a period equal to the period that the asset has been in use so that the final depreciated replacement cost is representative of the age of the asset.
- Restoration cost approach: The present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment.
- Service units approach: The present value of the remaining service potential of the asset is determined by reducing the current cost of the remaining service potential of the asset before

impairment, to conform to the reduced number of service units expected from the asset in its impaired state.

The decision as to which approach to use is dependent on the nature of the identified impairment.

In assessing value-in-use for cash-generating assets, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, other fair value indicators are used.

Impairment losses of continuing operations are recognised in the Statement of Financial Performance in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Economic Entity makes an estimate of the assets or cash-generating unit's recoverable amount.

Reversal of impairment losses

A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years.

The reversal of an impairment loss for an asset is recognised immediately in the Statement of Financial Performance.

19. REVENUE

19.1 Revenue from Exchange Transactions

Revenue from exchange transactions refers to revenue that accrues to the Economic Entity directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable, excluding indirect taxes, rebates and discounts.

Recognition

The recognition criteria is usually applied separately to each transaction

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits or service potential associated with the transaction will flow to the Economic Entity;
- (c) the stage of completion of the transaction at the reporting date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue shall be recognised only to the extent of the expenses recognised that are recoverable.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- (a) the Economic Entity has transferred to the purchaser the significant risks and rewards of ownership of the goods;

- (b) the Economic Entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) the amount of revenue can be measured reliably;
- (d) it is probable that the economic benefits or service potential associated with the transaction will flow to the Economic Entity; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue arising out of situations where the entity acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the entity as compensation for executing the agreed services.

Specific exchange-revenue sources

Service charges relating to electricity, water and sewerage are based on consumption. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced.

Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read and the related revenue adjustment is recognised in the same period.

Electricity meters in industrial areas are read at the end of each month and billed the following month. Premises with high-tension electricity supplies are read and billed monthly.

Revenue arising from the consumption of electricity and water in the month of June is fully accounted for whether invoiced or not.

Revenue from the sale of electricity prepaid meter cards is recognised at point of sale.

Revenue arising from the application of the approved tariffs, fees and charges is generally recognised when the relevant service is rendered.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff. Tariffs are determined per category of property usage and are levied monthly based on the costs of providing the refuse removal service.

Rental income arising from the use of investment properties, facilities and equipment is accounted for on a straight-line basis over the lease term on on-going leases.

Revenue from the issue of permits and licenses is recognised at point and time of issue.

Interest income is recognised in surplus or deficit on a time proportionate basis, using the effective interest method (i.e. based on the effective interest rate of the individual investments).

Interest earned on the following investments is not recognised in the Statement of Financial Performance:

- Interest earned on trust funds is allocated to the fund concerned; and
- Interest earned on unutilised conditional grants is allocated to the creditor (i.e. recognised as an obligation), if grant conditions indicate that interest is payable to the funder.

Measurement

Revenue from exchange transactions is measured at the fair value of the consideration received or receivable.

The Economic Entity has an obligation in terms of legislation to collect all revenue and as such, the Economic Entity does not consider the collective collectability of the revenue on initial recognition on a portfolio basis. The Economic Entity assesses collectability subsequent to initial measurement and should the receivable be impaired, the impairment loss is recognised as an expense.

19.2 Revenue from Non-Exchange Transactions

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a Economic Entity either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

Recognition of revenue

Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Recognition of assets

An inflow of resources from a non-exchange transaction that meets the definition of an asset is recognised as an asset when it is probable that the future economic benefits or service potential associated with the asset will flow to the Economic Entity and the fair value of the asset can be measured reliably. The asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow. A present obligation arising from a non-exchange transaction that meets the definition of a liability will be recognised as a liability when it is probable that an outflow of economic benefit will be required to settle the obligation and a reliable estimate of the amount can be made.

Specific non-exchange-revenue sources

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Council applies a flat rating system. The same rate factor is applied for land and buildings. In terms of this system, assessment rates are levied on the value of land and buildings in respect of properties. Rebates are granted according to the use of the property concerned. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis.

Fines are recognised when it is probable that future economic benefits will flow to the Economic Entity, the costs can be reliably measured and all restrictions have been complied with. Fines constitute both spot fines and summonses. Revenue from spot fines is recognised when payment is received and the revenue from the issuing of summonses is recognised when collected. Due to the various legal processes that can apply to summonses and the inadequate information received from the courts, it is not possible to measure this revenue in the invoicing period, therefore an accrual is raised at the end of the financial year based on the average collection of fines throughout the year.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualify for recognition and first becomes available for use by the Economic Entity. Where public contributions have been received but the Economic Entity has not met the related conditions that would entitle it to the revenue, a liability is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualify for recognition and first becomes available for use by the Economic Entity.

Fuel levy is recognised in revenue when the income is received.

Grants, transfers or donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset and there is no corresponding liability in respect of related conditions. Where the grant, transfer or donation has been received but the Economic Entity has not met the related conditions that would entitle it to the revenue, a liability is recognised.

Measurement of revenue from non-exchange transactions

Revenue from a non-exchange transaction shall be measured at the amount of the increase in net assets, recognised by the entity.

Fines

Assets arising from fines are measured at the best estimate of the inflow of resources to the Economic Entity.

Bequests

Bequests are measured at the fair value of the resources received or receivable.

Gifts and donations

On initial recognition, gifts and donations are measured at their fair value as at the date of acquisition, which may be ascertained by reference to an active market, or by appraisal. An appraisal of the value of an asset is normally undertaken by a member of the valuation profession that holds a recognised and relevant professional qualification.

An asset that is recognised as a result of a non-exchange transaction is recognised at its fair value at the date of the transfer. Consequently, revenue arising from a non-exchange transaction is measured at the fair value of the asset received, less the amount of any liabilities that are also recognised due to conditions that must still be satisfied.

Where there are conditions attached to a grant, transfer or donation that gave rise to a liability at initial recognition, that liability is transferred to revenue as and when the conditions attached to the grant are met. Therefore the best estimate of the amount required to settle the present obligation at the reporting date will be recognised as a liability.

Grants without any conditions attached are recognised as revenue in full when the asset is recognised, at an amount equalling the fair value of the asset received.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor.

The Economic Entity has an obligation in terms of legislation to collect all revenue and as such, the Economic Entity does not consider the collective collectability of the revenue on initial recognition on a portfolio basis. The Economic Entity assesses collectability subsequent to initial measurement and should the receivable be impaired, the impairment loss is recognised as an expense.

Expenditure from Non-exchange Transactions

The accounting policy for expenditure arising from non-exchange transactions is similar to policy for non-exchange revenue.

Expenditure from non-exchange transactions is recognised when the resources have been transferred to the beneficiaries. A corresponding asset is raised to the extent that conditions attached to the expenditure have not been met. The asset is transferred to the Statement of Financial Performance once the conditions are met.

20. BORROWING COSTS

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset unless it is inappropriate to do so. The Economic Entity ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete.

It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established.

Borrowing costs incurred are recognised as an expense in the Statement of Financial Performance using the effective interest method.

21. LEASES

Leases in the financial statements of lessees

Operating leases

Recognition

Assets subject to operating leases, i.e. those leases where substantially all of the risks and rewards of ownership are not transferred to the lessee through the lease, are not recognised in the Statement of Financial Position. Lease payments under an operating lease are recognised as an expense in the statement of financial performance, on a straight line basis over the lease term. To the extent that the straight-lined lease payments differ from the actual lease payments the difference is recognised in the Statement of Financial Position as either lease payments in advance (operating lease asset) or lease payments payable (operating lease liability) as the case may be.

Measurement

The resulting asset and / or liability is measured as the undiscounted difference between the straight-line lease payments and the contractual lease payments.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date, namely whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Derecognition

The operating lease liability is derecognised when the Economic Entity's obligation to settle the liability is extinguished. The operating lease asset is derecognised when the Economic Entity no longer anticipates economic benefits to flow from the asset.

Leases – Economic Entity as lessor

Operating leases

The Economic Entity presents assets subject to operating leases in its Statement of Financial Position according to the nature of the asset.

Lease revenue from operating leases is recognised as revenue on a straight-line basis over the lease term. Initial direct costs incurred by the Economic Entity in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as expenses over the lease term on the same basis as the lease revenue.

The depreciation policy for depreciable leased assets is consistent with the Economic Entity's normal depreciation policy for similar assets, and depreciation is calculated in accordance with the Standards of GRAP on Property, Plant and Equipment and Intangible Assets.

Recognition

For those leases classified as operating leases the asset subject to the lease is not derecognised and no lease receivable is recognised at the inception of the lease. Lease payments received under an operating lease are recognised as income, in the Statement of Financial Performance, on a straight-line basis over the lease period.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date, namely, whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Measurement

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined lease payments and the contractual lease payments are recognised as either an operating lease asset or operating lease liability. An operating lease liability is raised to the extent that lease payments are received in advance (i.e. the straight-line lease payments are more than the contractual lease payments). The operating lease asset and / or operating lease liability are measured as the undiscounted difference between the straight-line lease receipts and the contractual lease receipts.

Derecognition

Operating lease liabilities are derecognised when the Economic Entity's obligation to provide economic benefits or service potential under the lease agreement expires. Operating lease assets are derecognised when the Economic Entity's right to the underlying cash flows expire or the Economic Entity no longer expects economic benefits to flow from the operating lease asset.

22. REPORTING FOREIGN CURRENCY TRANSACTIONS IN THE FUNCTIONAL CURRENCY

Initial recognition

A foreign currency transaction shall be recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Reporting at subsequent reporting dates

At each reporting date:

- (a) foreign currency monetary items shall be translated using the closing rate;
- (b) non-monetary items that are measured in terms of historical cost in a foreign currency shall be translated using the exchange rate at the date of the transaction; and
- (c) non-monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was determined.

Recognition of exchange differences

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognised in surplus or deficit in the period in which they arise,

23. VALUE ADDED TAX (VAT)

The Economic Entity accounts for Value Added Tax on the payments basis. Revenue, expenses and assets are recognised net of the amount of VAT. The net amount of VAT refundable from or payable to, the taxation authority is disclosed on the face of the statement of financial position.

24. UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, Economic Entity or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure incurred for the financial period is accounted for as a normal expense in the Statement of Financial Performance but form part

of disclosure of unauthorised, irregular and fruitless and wasteful expenditure in the notes to the financial statements.

25. IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Economic Entity's Supply Chain Management Policy. Irregular expenditure incurred for the financial period is accounted for as a normal expense in the Statement of Financial Performance but form part of disclosure of unauthorised, irregular and fruitless and wasteful expenditure in the notes to the financial statements.

26. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure incurred for the financial period is accounted for as a normal expense in the Statement of Financial Performance but form part of disclosure of unauthorised, irregular and fruitless and wasteful expenditure in the notes to the financial statements.

27. RECOVERY OF UNAUTHORISED, IRREGULAR, FRUITLESS & WASTEFUL EXPENDITURE

The recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, and is recognised when the recovery thereof from the responsible officials is probable. The recovery of unauthorised, irregular, fruitless and wasteful expenditure is treated as other income.

28. TRANSFER OF FUNCTIONS BETWEEN ENTITIES NOT UNDER COMMON CONTROL

Common Control

For a transaction or event to occur between entities under common control, the transaction or event needs to be undertaken between entities within the same sphere of government or between entities that are part of the same economic entity. Entities that are ultimately controlled by the same entity before and after the transfer of functions are within the same economic entity.

The Economic Entity uses the acquisition method in accounting for transactions relating to transfer of functions, between entities not under common control.

Applying the acquisition method requires:

- a) Identifying the acquirer.
- b) Determining the acquisition date.
- c) Recognising and measuring the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.
- d) Recognising the difference between (c) and the consideration transferred to the seller.

The acquisition date is the date on which the acquirer obtains control of the acquiree.

Economic Entity as the acquirer:

At acquisition date, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree shall be recognised if:

- a) The assets taken on and the liabilities assumed meets the definitions of an asset and liability as set out in the Framework for the Preparation and Presentation of Financial Statements.
- b) These assets and liabilities relate to the binding agreement between the parties to the transaction and may not relate to separate transactions.

Assets and liabilities not previously recognised by the acquiree will be recognised if these assets and liabilities now meet the recognition criteria (for example internal generated intangible assets not previously recognised).

The acquirer measures the identifiable assets acquired and the liabilities assumed at their acquisition-date fair values.

29. EVENTS AFTER THE REPORTING DATE

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the Consolidated Financial Statements are authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- Those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

Adjusting events after reporting date

The Economic Entity adjusts the amounts recognised in the Consolidated Financial Statements to reflect adjusting events after the reporting date

Non-adjusting events after the reporting date

The Economic Entity does not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the reporting date. The Economic Entity discloses the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the Consolidated Financial Statements.

30. RELATED PARTIES

The Economic Entity has processes and controls in place to aid in the identification of related parties. A related party is a person or an entity with the ability to control or jointly control the other party or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. Related party relationships where control exists are disclosed regardless of whether any transactions took place between the parties during the reporting period.

Where transactions occurred between the Economic Entity and one or more related parties, and those transactions were not within:

- Normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the Economic Entity to have adopted if dealing with that individual entity or person in the same circumstances; and
- Terms and conditions within the normal operating parameters established by the Economic Entity's legal mandate,

Further details about those transactions are disclosed in the notes to the financial statements.

31. PRESENTATION OF BUDGET INFORMATION IN THE FINANCIAL STATEMENTS

Presentation of a comparison of budget and actual amounts

The Economic Entity presents a comparison of the budget amounts for which it is held publicly accountable and actual amounts as additional budget columns in the financial statements currently

presented in accordance with Standards of GRAP24. The comparison of budget and actual amounts present separately for each level of legislative oversight:

- (a) the approved and final budget amounts;
- (b) the actual amounts on a comparable basis; and
- (c) by way of note disclosure, an explanation of material differences between the budget for which the entity is held publicly accountable and actual amounts.

Presentation and disclosure

The Economic Entity presents a comparison of budget and actual amounts as additional budget columns in the primary financial statements because the financial statements and the budget are prepared on a comparable basis.

Changes from approved to final budget

The Economic Entity presents an explanation of whether changes between the approved and final budget are a consequence of reallocations within the budget or of other factors:

- (b) in a report issued before, at the same time as, or in conjunction with the financial statements, and shall include a cross reference to the report in the notes to the financial statements.

Comparable basis

All comparisons of budget and actual amounts are presented on a comparable basis to the budget.

The Economic Entity is typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by the Economic Entity shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by functional classification linked to performance outcome objectives.

The financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts. Comparative information is not required.

32. COMMITMENTS

Items are classified as commitments when the Economic Entity has committed itself to future transactions that will normally result in an outflow of cash.

Disclosure is done to the extent that it has not already been recognised elsewhere in the financial statements.

Capital commitments are treated as follows:

- The aggregate amount of capital expenditure contracted for at the reporting date, to the extent that the amount has not been recorded in the financial statements; and
- If a commitment is for a period longer than a year.

Commitments are disclosed in the following circumstances:

- Unrecorded capital expenditure approved and contracted for before/at reporting date;

- Unrecorded capital expenditure approved but not yet contracted for at reporting date; and
- Unrecorded capital expenditure approved after reporting date.

33. GRANTS-IN-AID

The Economic Entity transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the Economic Entity does not:

- Receive any goods or services directly in return as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or
- Expect a financial return, as would be expected from an investment.

These transfers are recognised in the statement of financial performance as expenses in the period in which the events giving rise to the transfer occurred.

34. IMPAIRMENT

Impairment of cash generating units:

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information

- (a) During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
- (b) Significant changes with an adverse effect on the entity have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which an asset is dedicated.
- (c) Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially.

Internal sources of information

- (d) Evidence is available of obsolescence or physical damage of an asset.
- (e) Significant changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite.
- (f) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (g) Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Impairment of non-cash generating units:

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information

- (a) Cessation, or near cessation, of the demand or need for services provided by the asset.
- (b) Significant long-term changes with an adverse effect on the entity have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the entity operates.

Internal sources of information

- (c) Evidence is available of physical damage of an asset.
- (d) Significant long-term changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in

which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, or plans to dispose of an asset before the previously expected date.

- (e) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (f) Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

35. CONSTRUCTION CONTRACTS

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of the contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that is probable to be recovered. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Where contract costs incurred to date exceed capital grants received, the surplus is shown as amounts due from funders for contract work. For contracts where capital grants received exceed contract costs incurred to date, the surplus is shown as the amounts due to funders for contract work. Amounts received before the related work is performed are included in the statement of financial position, as a liability, as unspent project funding received. Amounts billed for work performed but not yet paid by the funder are included in the statement of financial position under trade and other receivables.

Unutilised project funding is reflected on the Statement of Financial Position as a Current Liability - Unspent Project Funding. The cash received is invested until it is utilised.

36. PRINCIPLE AGENT TRANSACTIONS

MBDA was appointed by its parent municipality NMBM to act as its agent in the management of the NMB Stadium operations. As part of its custodial responsibilities the agency is responsible for the total operations in terms of event, financial and risk management, and to ensure that this facility becomes more sustainable over the longer term.

NMBM, however incorporates all revenue and expenditure of the NMB Stadium in the books of NMBM.

37. SERVICE CONCESSION ARRANGEMENTS

No service concession arrangements have been entered into.

	1 016 456 460	1 118 615 583	1 016 371 753	1 116 776 821

The Financial liabilities are measured at amortised cost taking into account relevant interest rates.

Council approved a new loan of R750 million for various capital projects, with loan withdrawals only commencing in the 2020/2021 financial year.

In line with Chapter 6 of the MFMA, no loans are secured.

DBSA

A further loan of R420 000 000 was taken up during the 2008/09 financial year and is repayable over 20 years in 38 half yearly instalments of R27 651 367, by 30 September 2029, at a fixed interest rate of 11.62% per annum with a final payment of R27 651 367. The loan was used for various capital projects. A capital amount of R17 292 126 and interest of R38 010 607 was repaid during the financial year. (2019: Capital repaid R15 512 299 and Interest paid R39 790 434)

NEDBANK

The loan of R745 000 000 was taken up during the 2009/10 financial year and is repayable over 15 years in 30 half yearly instalments of R52 372 749, by 31 January 2025, at a fixed interest rate of 11.7% per annum. The loan was used for various capital projects. A capital amount of R54 540 977 and interest of R50 227 020 was repaid during the financial year. (2019: Capital repaid R48 678 958 and Interest paid R56 089 039)

RAND MERCHANT BANK

The loan of R470 000 000 was taken up during the 2010/11 financial year and is repayable over 20 years in 40 half yearly instalments of R27 779 027, by 31 May 2031, at a fixed interest rate of 10.24% per annum. The loan was used for various capital projects. A capital amount of R17 315 635 and interest of R38 242 419 was repaid during the financial year. (2019: Capital repaid R15 569 153 and Interest paid R39 988 901)

BROOKES BEQUEST

Brookes bequest represents a long-term creditor. The capital of the fund, may not be used until 100 years after the death of the last annuitant. The funds can only be utilised by the NMBM when the two remaining Trustees approve the donation of funds to the NMBM. The interest may be utilised for capital projects related to the development of Humewood. The fund bears interest at an average of 6.64% per annum.

LONG-TERM LIABILITIES - ENTITY INCLUDES:

CONSTRUCTION CONTRACT RETENTION AND DEFERRED INCOME

Construction contract retention creditors relate to retentions held in projects in line with accepted construction accounting principles. Such retentions are payable 3 to 12 months after official sign off of the project, and are non-interest bearing.

4.2 NON-CURRENT PROVISIONS - OTHER

Rehabilitation of Landfill sites	358 133 740	407 057 209	358 133 740	407 057 209
Rehabilitation of Swartkops River	73 643 693	71 681 592	73 643 693	71 681 592
Total Non-current Provisions	431 777 433	478 738 801	431 777 433	478 738 801

Rehabilitation of landfill sites

In terms of the licensing conditions of the landfill refuse sites, Council will incur rehabilitation costs of R111,842,858 for the Arlington Landfill site, R110,796,300 for the Koedoeskloof Landfill site and R135,494,582 for the Ibhayi Landfill site determined at net present value to restore the sites at the end of their useful lives estimated to be in 2027 (Arlington) and 2028 (Koedoeskloof). Squatters are currently occupying the Ibhayi Landfill site that is already closed. Provision has been made for the rehabilitation of the landfill sites based on the net present value of cost. For Arlington and Koedoeskloof landfill sites, the cost factors as determined have been applied and projected at an inflation rate of 2.2%. The projected amounts are discounted to the present value at the average borrowing rate of 11.14%. The determined cost to rehabilitate Ibhayi landfill site represents the present value.

A change in useful lives and reduced CPI index, have caused the change in the value of the provision.

Balance at beginning of year	407 057 209	313 248 967	407 057 209	313 248 967
Contributions to Provision	(48 923 469)	93 808 242	(48 923 469)	93 808 242

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

12 INVESTMENT PROPERTY (Continued)

Additional Disclosure:

The NMBM applies the Cost Model.

The Market Value was determined by valuers of the Rates and Valuations Directorate within NMBM who are experts in this field. The property values are consistent with the prior years and no updated valuations has been performed in the current year. The valuations was based on the 2016 Valuations roll, which is valid for 5 years - refer note 20:

The depreciated replacement cost method of valuation was applied in determining the valuation of the property. This method of valuation is usually applied to properties that do not often change hands in the open market. The depreciated replacement cost method of valuation is calculated by determining the replacement cost of the improvements, as at the date of the valuation, less a depreciation factor, which comprises physical deterioration, functional obsolescence and location deterioration. The value of land is determined by means of comparable sales of similar properties in the area. The two values are added together to arrive at the valuation of the property.

Properties subject to Operating Leases:

Rental revenue included in surplus for following Investment Properties:

Beachview resort
 Van Stadens Resort
 Something Good

Direct Operating expenses that generated rental revenue
 Direct Operating expenses that did not generate rental revenue

18 CALL DEPOSITS AND INVESTMENTS - OTHER (CONTINUES)

The Municipality's Investment Policy and Investment Regulations, require local authorities to invest funds, which are not immediately required, with prescribed institutions and the period should be such that it will not be necessary to borrow funds against the investment at a penalty rate of interest to meet commitments.

The NMBM is the holder of 40 919 shares in Sanlam Ltd received or allotted for no cost, of which the market value is R2 411 766 (2019: R3 198 229) determined on the open market share price as at 30 June 2020. The shares were awarded to the NMBM as the beneficiary of an insurance endowment policy, which matured during October 1998.

All deposits are invested in call accounts with all of the above banks as per the above-mentioned interest rate options. Short-term investment deposits form part of cash and cash equivalents for purposes of the cash flow statement.

Short-term Investment Deposits amounting to R99 142 909 (2019: R89 658 501) are ring-fenced and attributable to repaying long-term loans.

19 BANK BALANCES AND CASH

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

35	DISCLOSURES IN TERMS OF MUNICIPAL FINANCE MANAGEMENT ACT	Economic Entity		Municipality	
		2020	Restated 2019	2020	Restated 2019

OTHER ADDITIONAL DISCLOSURES:**35.7 IMPAIRMENT**

Impairment	102 537 877	15 820 657	102 537 877	15 820 657
------------	--------------------	-------------------	--------------------	-------------------

The Impairment relates to Intangible Assets.

No reversals for Impairment were applicable during the current financial year

35.8 LOSS ON DISPOSAL OF PROPERTY, PLANT AND EQUIPMENT

Loss on disposal of property, plant and equipment	0	1 190 151	0	1 188 260
---	----------	------------------	----------	------------------

It must be noted that there were no Loss on Disposal of Property, Plant and Equipment.

It must be noted that there were no Gains on Disposal of Property, Plant and Equipment.

35.9 WATER LOSSES

The NMBM suffered water losses of 49,522 megalitres (46.3%) amounting to R65.5 million (2019: 44,220 megalitres (43.9%) amounting to R62.8 million) during the year. The value of the water losses have been based on cost for both years. Various water demand management interventions are being implemented to curb water losses.

The 46.3% of water losses are made up of apparent (commercial) losses (8.8%) and real (physical) losses (35%) and unbilled authorised consumption (2.5%).

Apparent losses include unauthorised consumption from theft or illegal use, plus all technical and administrative inaccuracies associated with customer metering.

35.10 ELECTRICITY LOSSES

The NMBM suffered electricity losses of 20.30% amounting to total accumulative losses of R 558.63 million (2019: 15.47% amounting to R 484.18 million). Various electricity management interventions are being implemented to curb these losses are being implemented.

The Electricity losses as defined above are separated between technical (6% amounting to R 164,256,445) and non-technical losses (14.3% amounting to R 394,369,846). Technical losses are inherent losses in a distribution system ad these includes copper losses, Iron losses and heat losses due to current flow. Public lighting includes traffic signals, Highmast and Streetlights. Non-Technical Losses can be attributed to theft that is illegal connections, meter tampering and non billed revenue due to faulty meters.

It must be further noted that the prescribed norms for electricity losses is +/- 10%.

39 FINANCIAL RISK MANAGEMENT					

There have been no significant changes in the risks below from the prior year to current. The risks have remained the same.

Interest rate risk

The NMBM is not exposed to interest rate risk on its financial liabilities. All of the NMBM's interest-bearing external loan liabilities, as detailed in Note 3 are fixed interest loans. No interest rate swap agreements have been entered into. The NMBM invests its surplus funds in fixed interest rate deposits with banks for fixed terms not exceeding one year.

Liquidity risk

The liquidity risk is the risk that the NMBM is not able to settle its obligations. The NMBM manages liquidity risk by effectively managing its working capital, capital expenditure, external borrowings and cash flows. The NMBM has secured standby credit facilities in the form of an overdraft facility with its banker in order to cater for any unexpected temporary shortfall in operating funds. The maximum exposure to liquidity risk is the trade creditors and long term borrowings. Consumer deposits have a low exposure to liquidity risk.

The following table details the NMBMs remaining contractual maturity for its financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the NMBM can be required to pay. The table includes both estimated interest and principal cash flows. A sensitivity analysis was not considered to be necessary.

Trade payables				
1-3 months	2 527 051 965	2 469 528 583		2 485 896 294
> 3 months	97 103 200	103 810 789		97 103 200
	2 624 155 165	2 573 339 372		2 582 999 494

Long term borrowings

< 12 months	99 142 909	89 658 501		99 142 909	89 658 501
> 12 months	1 016 456 460	1 118 615 583		1 016 371 753	1 116 776 821

Credit risk

The NMBM manages credit risk in its borrowing and investing activities by dealing with only A-rated financial institutions, and by spreading its exposure over a range of such institutions in accordance with its approved Cash Management and Investments Policy. Credit risk relating to consumer debtors is managed in accordance with NMBM's credit control and debt collection policy. The NMBM's credit exposure is spread over a large number and wide variety of consumers and is not concentrated in any particular sector or geographical area. Adequate provision has been made for anticipated bad and doubtful debts. Additional information relating to the analysis of consumer debtors is given in Note 15 to the financial statements. The maximum exposure to credit risk is the consumer debtors, which may reduce as a result of non-payment by debtors.

Refer to note 52 for table.

Fair value interest risk

The NMBM is exposed to fair value interest rate risk on its external loan liabilities, which are all fixed interest rates. The fair value of financial assets and liabilities are disclosed and compared with their carrying values. See note 52 for fair values of all financial liabilities. SANLAM shares is the only financial instrument and has a very low risk exposure and have been disclosed at the Market value of the share as at 30 June.

Currency risk

There were no currency risk exposure in the current and prior year.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

**41 CHANGE IN ACCOUNTING ESTIMATE
PROPERTY, PLANT AND EQUIPMENT
2020 Financial year**

A conditional assessment is done annually on property, plant and equipment, which indicates whether the useful lives of the assets have increased or decreased and as a result of this condition assessment some assets' useful lives have either increased or decreased and therefore the depreciation charge has now changed, which is included in the total depreciation/amortisation.

In assessing whether there is any indication that the expected useful life of an asset has changed, the following indications have been considered - whether:

- (a) The composition of the asset changed during the reporting period, i.e. the significant components of the asset changed
- (b) The use of the asset has changed, because of the following:
 - (i) The municipality has changed the manner in which the asset is used
 - (ii) The municipality has changed the utilisation rate of the asset
 - (iii) The municipality has made a decision to dispose of the asset in a future reporting period(s) such that this decision changes the expected period over which the asset will be used
 - (iv) Technological, environmental, commercial or other changes that occurred during the reporting period that have, or will, change the use of the asset
 - (v) Legal or similar limits placed on the use of the asset have changed
 - (vi) The asset was idle or retired from use during the reporting period
- (c) The asset is approaching the end of its previously expected useful life
- (d) Planned repairs and maintenance on, or refurbishments of, the asset and/or its significant components either being undertaken or delayed
- (e) Environmental factors, e.g. increased rainfall or humidity, adverse changes in temperatures or increased exposure to pollution
- (f) There is evidence that the condition of the asset improved or declined based on assessments undertaken during the reporting period
- (g) The asset is assessed as being impaired in accordance with GRAP 21 and GRAP 26.

Amount of revenue recognised - Operating

Amount of revenue recognised - Capital

Method used to determine the Revenue

Revenue is determined on a claims basis where the Municipality submit claims to the ECDoHS for expenditure incurred.

Method used to determine the stage of completion of contracts in progress:

Subsidies are approved per site for a set amount, which is determined by ECDoHS. Projects are implemented per stage and the contractors are also paid per stage.

Aggregate amount of Costs incurred and recognised surpluses (less recognised deficits) to date for houses not yet transferred

**43 OPERATING LEASE COMMITMENTS
Municipality as Lessee**

Economic Entity

2020	Restated 2019
R	R

Municipality

2020	Restated 2019
R	R

The Municipality normally enters into a lease agreement over 3 years for most of the Operating leases.

Some leases have escalations ranging between 7 and 10% and an option to renew.

Some leases have restrictions, such as not to sub-let or not to sub-let without consent. There are no sub-leases in place that we are aware of.

The Municipality has no sale and leaseback transactions.

Future minimum lease payments under non-cancellable operating leases:

44 UNAUTHORISED, IRREGULAR, FRUITLESS AND WASTEFUL EXPENDITURE DISALLOWED (Continued)

44.2 Irregular Expenditure (Continued)

5 Irregular Expenditure review by Internal Audit

NB: This section of the Irregular Expenditure represents the "historic" irregular expenditure incurred as reported by Internal Audit Unit in terms of the two reports that were issued in 2014/15 and 2015/16 relating to a number of financial years dating back from around 2003. The irregularity in these instances continued to 2016/17 financial year as some of the tender / SCM Files were still in use (or work proceeding). This figure therefore does not relate to any irregularity that may have occurred during the year under review (i.e. 2016/17). Important to note is the fact that there are reports that have been taken to Council structures in order to deal with these matters and the first reports were discussed at MPAC Sub Committee on the 31 August 2017.

Non-compliance with regards to the Formal Bid and Deviation process

Incurred - Current year - Relating to current year Tenders	3 543 056	75 481 030
Incurred - Current year - Relating to prior year Tenders	681 715 962	1 212 716 616

7 Information not available (Limitation of Scope)		
Opening Balance - previously stated	3 057 877 747	2 593 906 602
Restatement	0	0
Restate Opening Balance	3 057 877 747	2 593 906 602
Incurred - Current year - Relating to prior year Tenders	281 022 266	463 971 145
Written off by Council - Other	0	0
	3 338 900 013	3 057 877 747
Total amount written off by Council in respect of ALL cases	0	0

This section of the note has not been included in the Irregular expense calculation, because it is impracticable in terms of GRAP 1 to determine whether the tender files are indeed Irregular or Regular as described below:

This disclosure note represents expenditure incurred on SCM / Tender files that were declared by Internal Audit Unit in around 2014/15 and 2015/16 to be a LIMITATION OF SCOPE as the AG could not be provided with the said files. The expenditure referred to dates back to around 2003 financial year. As the expenditure on the affected SCM / Tender Files continued to the 2016/17 financial year the actuals have been extended to include the reported financial year. Detailed reports dealing with these files are to be submitted to Council structures starting from the MPAC Sub Committee dated 31 August 2017, whereafter the note will be amended only after Council approves the recommendation/s on how to deal with these matters. This effectively means that this expenditure is historic or relates to historic financial years.

46 EVENTS AFTER REPORTING DATE

46.1 Nelson Mandela Bay Municipality

WITHHOLDING OF GRANT FUNDING BY NATIONAL TREASURY

On 29 June and 15 July 2020, National Treasury addressed correspondence to the Municipality indicating that grant funding would be withheld in view of certain non-compliance matters. The Municipality had further engagements with National Treasury on 21 October 2020, regarding the withholding of grants in the amount of R1.6 billion, in relation to the 2019/20 and 2020/21 financial years. Emanating from this meeting, National Treasury addressed correspondence to the Municipality on 23 October 2020, indicating that the Municipality must adopt an Action Plan, to implement the NT conditions for the release of the outstanding grants as communicated in the NT letter of 24 February 2020. The letter of 23 October 2020, also indicated that the Interim Executive Mayor, is required to provide a comprehensive response to the Deputy Finance Minister's correspondence of 15 July 2020. The Action Plan, was adopted by Council on 28 October 2020. On 23 November 2020, National Treasury addressed correspondence to the Municipality indicating its decision to release the outstanding Equitable Share and Conditional Grants due to the Municipality, in view of the commitment to improve performance as demonstrated by the current administrative leadership.

46.2 Possible Contingent Liabilities

Various claims arising from alleged negligence by the Municipality due to damages sustained by the Plaintiffs.

6 451 712 0

Various claims due to supply chain related issues or creditor payment related matters.

869 000 0

7 320 712 0

46.3 COVID-19 Expenditure

The major impacts of COVID-19 are the following:

Council had to adopt a second adjustments budget to provide for COVID-19 expenditure, including the reprioritisation of USDG grant funding to cover such expenditure. It also had a significant impact on project implementation timeframes and service delivery with consequential impacts on the achievement of targets as set out in the SDBIP.

Total expenditure as at 30 June 2020

30 945 262 0

46.4 Mandela Bay Development Agency

The term of the Board of Directors was terminated on 06 July 2020. As a result the entity has been operating without a Board.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits

RETIREMENT BENEFIT INFORMATION

The Nelson Mandela Bay Municipality makes provision for post-retirement benefits to employees who belong to different pension schemes. These funds are governed by the Pension Funds Act, and include both defined benefit and defined contribution schemes. Contribution of R326.013 million (2019: R302.028 million) to the defined benefit and defined contribution structures are expensed as incurred during the financial year ended 30 June 2020.

DEFINED CONTRIBUTION SCHEMES

CONSOLIDATED RETIREMENT FUND

The contribution rate paid by the members (9%) and the NMBM (18%) is sufficient to fund the benefits accruing from the fund in future. The actuary certified the fund as being in a sound financial position as at 30 June 2019. The funding level of the Share Account is 100.3%, the Preservation fund is 100% and the Pensions Account reflected a funding level of 124.9% as at 30 June 2019.

SALA CONTRIBUTION FUND

The SALA Contribution Fund operates as a defined contribution scheme. The contribution rate paid by the members (7.92%) and their councils (19.18%) is sufficient to fund the benefits accruing from the Fund in the future. The fund is 100% funded.

SOUTH AFRICAN MUNICIPAL WORKERS UNION (SAMWU) NATIONAL PROVIDENT FUND

The SAMWU National Provident Fund is a defined contribution scheme. The last actuarial valuation of the Fund was performed at 30 June 2008, and certified it as being in a financially sound position with the funding level remaining at 100% since the previous valuation date, 30 June 2005. The 30 June 2011 report is not available yet and is expected to be available towards the end of 2014. The contribution rate paid by the members (7.5%) and their councils (18%) is sufficient to fund the benefits accruing from the Fund in the future.

DEFINED BENEFIT SCHEMES

CAPE JOINT PENSION FUND

The defined benefit scheme is a multi-employer plan, and the contribution rate payable is 27% (9% by the members and 18% by their councils). The fund was certified by the actuary as being in a sound financial condition as at 30 June 2019 and is funded at 100.3%.

SALA PENSION FUND

The defined benefit scheme is a multi-employer plan, and the contribution rate payable is **26.67% (7.92% by the members and 19.18% by their councils)**. This defined benefit plan, is financially sound, and was 100% funded as at 30 June 2013.

The Nelson Mandela Bay Municipality has used GRAP 25 as guidance for treatment of multi-employer plans as sufficient information was not available to use defined-benefit accounting. The Municipality has therefore accounted for the Cape Joint Pension Fund and the SALA Pension Fund as defined contribution plans. It is impracticable to disclose as a defined benefit plan because the funds do not determine a separate actuarial valuation per Municipality but do it as a whole for all the Municipalities together.

EX GRATIA PENSIONS

General Description

The Ex-gratia pension benefits scheme operates as pensions that are being paid from the Council's revenue, that is, they are not funded or paid from one of the Employer's formalised pension arrangements.

Employees who were under the age of 55 when appointed and who have at least ten years' service at retirement, will receive an annual ex-gratia pension calculated as:

Annual salary * 1/47 * Years of non-pensionable service

An employee's widow will get 50% of the accrued (full service) pension on the employee's death. This is subject to a maximum of the Government Old Age Pension and will cease at age 60.

Pensions increase in line with those granted by the Cape Joint Pension Fund and increases at 50% of CPI inflation.

Detailed Results

An actuarial valuation of the Municipality's unfunded liability in respect of revenue pension benefits to eligible employees and retirees of the Nelson Mandela Bay Municipality, was performed as at 30 June 2020. The unfunded liability in respect of past service has been valued at R53.528 million, of which R49.585 million relates to the non-current portion.

Past and Future Changes in the Accrued Liability

The table below shows the development of the accrued liability over the current period, and projects the Municipality's Unfunded Accrued Liability and periodic costs.

KEY ASSUMPTIONS

Summary of economic assumptions that were used in the valuation:

Assumption	Current Valuation 30 June 2019	Current Valuation 30 June 2020
Discount rate	8.97%	10.04%
Inflation risk premium	0.50%	
Inflation assumption	5.56%	5.32%
Salary increase rate	6.56%	6.32%
Pension increase rate	2.78%	2.66%
Net effective discount rate	6.02%	7.18%

Discount Rate Assumption:

The discount rate has been set by taking the average yield from the Zero-Coupon SA Government bond curve, with a duration of 9 years, as was done for the previous valuation. The recommended discount rate as at 30 June 2020 is 10.04% per annum. The source is the Johannesburg Stock Exchange through the I-net data service. The discount rate was set at 8.97% p.a. for the previous valuation.

Future Inflation Assumption:

The general inflation assumption is used to estimate the base rate for determining the rate at which the future salaries and hence ex-gratia benefits will increase.

The market's pricing of inflation was estimated by comparing the yields on nominal bonds to the yields on real bonds on the yield curve of bonds, with a duration of 9 years as was done for the previous valuation. The resulting inflation assumption is therefore 5.32% per annum as at 30 June 2020. The source is the Johannesburg Stock Exchange through I-net BFA data service. The future inflation assumption was set at 5.56% for the previous valuation.

Future Salary Inflation Assumption:

The general inflation assumption is used to establish the base rate for determining the rate at which the future salaries and hence ex-gratia benefits will increase.

It has been assumed that salary inflation will exceed general inflation by 1.0% per annum. Therefore, a salary inflation assumption of 6.32% per annum has been used as at 30 June 2020.

The future salary inflation assumption was set at 6.56% per annum for the previous valuation.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits (Continued)

Pension Increase Assumption:

Pension increases are in line with those granted by the LA Retirement Fund (previously known as the Cape Joint Pension Fund). Based on recent experience, pension increases are assumed to be set at 50% of the expected inflation assumption. This is consistent with what was done for the previous valuation.

The expected pension increase rate is, therefore, 2.66% per annum as at 30 June 2020.

The expected pension increase rate was set at 2.78% per annum for the previous valuation.

Post Retirement net discount rate:

Net discount rate is the gap between the discount rate and the expected increase in salary inflation.

The net discount rate for ex-gratia pension benefits as at 30 June 2020 is assumed to be 7.18% per annum (derived from the discount rate of 10.04% and the expected increase rate of 2.66%).

The net discount rate was set at 6.02% per annum for the previous valuation.

Demographic Valuation Assumptions:

Actuarial valuation assumptions are required to be made about demographic variables (such as, employee turnover and mortality) that will influence the cost of the benefit, discounting that benefit using the Projected Unit Credit Method.

The demographic assumptions used in the previous valuation have been retained and these assumptions are as follows:

Pre-retirement Mortality:

It has been assumed that the pre-retirement mortality will be in line with the SA85-90 table, which is a table reflecting mortality experience in South Africa. This assumption was used for the valuation of in-service members.

This assumption is consistent with that of the previous valuation.

Post-retirement Mortality:

The post-retirement mortality assumption is based on the PA (90) ultimate table. This assumption was used for the mortality of continuation members (retired employees).

This assumption is consistent with that of the previous valuation.

Assumed Retirement Age:

The normal retirement age is 65 for all male employees and is 60 for all female employees.

The retirement age of 63 for all male employees and retirement age of 58 for all female employees has been assumed, which allows for some early retirement and is consistent with assumptions used for valuing other Municipality liabilities.

This assumption is consistent with that of the previous valuation.

Family Profile:

It is assumed that 90% of in-service members will be married at retirement.

It has been further assumed that the female spouse will be 3 years younger than the male spouse. For continuation members the actual spouses' dates of birth were used, where provided.

The data provided in respect of the retired members indicated the marital status of the members. This actual adult dependant status was therefore used.

Withdrawal Rates:

The table below reflects the rates of withdrawal used to value the liabilities for both males and females:

Age	Withdrawal Rate Males	Withdrawal Rate Females
20	24%	16%
25	18%	12%
30	15%	10%
35	10%	8%
40	6%	6%
45	4%	4%
50	2%	2%
55	1%	1%
60+	0%	0%

Developments since the previous valuation:

There has been no changes to the ex-gratia pension benefit since the previous valuation, therefore, it is assumed the level of benefits will remain unchanged with the exception of allowing for inflationary adjustments.

Plan Assets:

Management has indicated that there are no long-term assets set aside off-balance sheet in respect of the Municipality's post-employment ex-gratia pensions.

Sensitivity Analysis

The results of the valuation are dependent on the underlying assumptions made and the actual cost of the ex-gratia benefit will, however, depend on the actual experience.

The tables below illustrate the likely impact certain changes to the underlying assumptions would have on the results:

Liability: the aggregate of the current service cost and interest cost components of the net periodic costs; and

Cost/(Saving): the accumulated obligation for the ex-gratia benefit obligation.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
 NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits (Continued)

Sensitivities as at 30 June 2020

Cost / (Saving)		-1 309	1 267

For the purposes of disclosure, all other assumptions are to be held constant.

POST-EMPLOYMENT HEALTH CARE BENEFITS

Benefit Structure

Medical Aid Scheme Arrangements:

The Municipality offers employees and continuation members (pensioners) the opportunity of belonging to one of several medical aid schemes, most of which offer a range of options pertaining to levels of cover. Upon retirement, an employee may continue membership of the medical aid scheme. Upon a member's death-in-service or death-in-retirement, the surviving dependants may continue membership of the medical aid scheme.

Contribution Rate Structure:

Members contribute according to the tables of contribution rates, which differentiate between them on the type and number of dependants. Some options also differentiate on the basis of income.

Subsidy Arrangements:

The Municipality has agreed to subsidise the medical aid contributions of retired members as follows:

In accordance with Resolution 8 of the SALGBC (SALGA), all existing and new pensioners (employees currently in service) and their dependants will receive a subsidy ranging between 60% and 70% subject to the maximum (CAP) amount of **R4,218.00** (per month, per member) for the period from 1 July 2019 to 30 June 2020. The subsidy for LA Health members is 70%, while members of other schemes only qualify for a 60% subsidy. The maximum (CAP) amount was R4,218.00 in the previous financial year.

The maximum subsidy is expected to increase at 50% of inflation.

Eligible employees should have at least five years of service to qualify for a benefit at retirement.

Valuation Method

The value of the Municipality's accrued liabilities has been determined by using the Projected Unit Credit Method and a set of actuarial assumptions.

Post Employment Medical Aid Liabilities:

The liability in respect of active employees is determined by discounting the projected future benefit payments in respect of these members using assumptions regarding the possible future experience. The liability has been proportioned between past service and future service.

The liability in respect of current pensioners is fully accounted for.

The current service cost is the cost of providing the benefits over the year following the valuation date.

All actuarial gains and losses are recognised immediately and we have not allowed for any disclosure under the corridor method.

Valuation of Assets:

As at the valuation date, the medical aid liability of the municipality was unfunded, that is, no dedicated assets have been set aside to meet this liability. Therefore, no assets have been considered as part of this valuation.

Detailed Results

The projected total liability in respect of post-retirement health care benefits amounts to R1,513.131 million as at 30 June 2020 (2019: R1,394.063 million). Provision for R1,513.131million has been made (non-current R1,427.592 million, current R85.539 million). It is expected that approximately 5.6% of the amount provided will be expensed per annum. This is dependent on the accuracy of the assumptions below.

KEY VALUATION ASSUMPTIONS AND DEVELOPMENTS

Summary of economic assumptions that were used in the valuation:

Assumption	Valuation 30 June 2019	Valuation 30 June 2020
Discount rate	10.68%	14.21%
Future Inflation	6.99%	8.96%
Medical Inflation	8.49%	10.46%
Subsidy Inflation	3.50%	4.48%
Post Retirement Interest Rate (Medical Inflation)	2.01%	3.40%

Discount Rate:

The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date, on Government Bonds.

The average nominal yield curve for SA Government bonds with duration between 15 and 20 years have been used as at 30 June 2020. The resultant discount rate was 14.21% for 30 June 2020.

The source of the data is the Johannesburg Stock Exchange through I-net BFA data service.

Future Inflation Assumptions:

The general inflation assumption is used to estimate the base rate for determining the rate at which the future salaries will increase.

The difference between the above nominal and real bonds with duration of between 15 and 20 years has been used. The implied inflation assumption is therefore 8.96% per annum for 30 June 2020.

The source of the data is the Johannesburg Stock Exchange through I-net BFA data service.

Future medical Inflation Assumption:

The general inflation assumption is used to estimate the base rate for determining the rate at which the future medical subsidies will increase.

It is assumed that medical cost will outstrip general inflation by about 1.5% per annum, as South Africa has experienced high medical cost inflation in recent years.

The medical cost inflation was therefore set at 10.46% per annum for 30 June 2020.

Net Discount Rate:

The net discount rate is the gap between the values used for the discount rate and the expected increase in salaries. The net discount rate is 3.40% per annum for 30 June 2020, (derived from the discount rate of 14.21% and the expected medical inflation rate of 10.46%).

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits (Continued)

Demographic Valuation Assumptions:

Pre-Retirement Mortality:

It has been assumed that the pre-retirement mortality will be in line with the SA 85-90 light table, rated down by 3 years for female members, which is atable reflecting mortality experience in South Africa.

Post-Retirement Mortality:

The PA90 ultimate mortality table was used in the valuation for the mortality of Continuation Members.

Withdrawal Rates:

Age	Withdrawal Rate Females	Withdrawal Rate Males
20	24%	16%
30	15%	10%
40	6%	6%
50	2%	2%
55+	0%	0%

Assumed Retirement Age:

The normal retirement age is 65 years. Consistent with the previous years' assumptions, it has been assumed that male employees will retire at age 63 and female employees at age 58, which implicitly allows for the expected rates of early retirement.

Family Profile:

It is assumed that 90% of In-Service Members on a medical arrangement will be married at retirement. Males are assumed to be five years older than their female spouses. Where the data provided in respect of the Continuation Members, indicated that the spouse was married we have used the actual spouses date of birth. Where this was not known, we have assumed that the male spouse was 5 years older than the female spouse. Members have been assumed to have no dependent children after retirement.

Continuation of Membership:

It has been assumed that 100% of In-Service Members will remain on the Municipality's health care arrangement should they stay until retirement. No provision has been made for employees currently not on Municipality-sponsored scheme to join prior to retirement. This is consistent with previous years' assumptions. It was assumed that employees retiring will remain on the current plan and option at retirement and it was assumed they will remain in the same income category after retirement.

Changes since the previous valuation:

There were no changes to the rules governing payment and eligibility for the medical subsidy since the previous valuation. As far as the assumptions are concerned, the discount rate and general inflation, which are dependent on the market at the time of valuto, are different from the previous valuation.

Plan Assets:

Management has indicated that there are no long-term assets set aside off-balance sheet in respect of the Municipality's post-employment health care liability.

Sensitivity Analysis

The results are based on a number of assumptions. The extent to which the actual liability faced by the Municipality in the future differs from these results will depend on the extent to which actual expenditure differs from the assumptions made.

GRAP 25 requires disclosure of the effect of an increase of one percentage point and the effect of a decrease of one percentage point in the assumed medical cost trend rates on:

- the aggregate of the current service cost and interest cost components of the net periodic post-employment medical costs; and
- the accumulated post employment benefit obligation for medical costs.

For the purposes of disclosure, all other assumptiond are to be held constant.

The following changes were made:

- A 1% increase/decrease in the net discount rate; and
- A 1 year increase/reduction in the normal retirement age.

30 June 2020 Sensitivities

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits (Continued)

LONG SERVICE AWARD AND LONG SERVICE BONUS

Description of the Long Service Award Arrangement

Long Service Bonuses:

Long service benefits are awarded in the form of leave days and a percentage of annual salary. The awarded leave days have been converted into a percentage of the employee's annual salary, for valuation purposes.

The conversion is based on a 250 working day year.

The LSB benefits have improved significantly from 01 July 2017. The Municipality now offers employees LSB as outlined below.

Long Service Awards:

In addition to the above, employees are eligible to receive a Long Service Award to the value of R2,500 upon completion of 25 years in service.

The table below describes the benefits accruing to those employed under the SALGBC LSB Agreement. The policy applicable to the subgroups appointed prior to 01 July 2017 will change to the policy outlined in tables 2 to 4, once they reach twelve years of service.

Table 1: Long Service Bonus for levels of past service:

Completed Service (in years)	Long Service Bonuses (% of Annual Salary)	Description
5	4%	(5/250+2%) * annual salary
10	7%	(10/250+3%) * annual salary
15	10%	(15/250+4%) * annual salary
20	11%	(15/250+5%) * annual salary
25, 30, 35, 40 and 45	12%	(15/250+6%) * annual salary

Tables 2 to 4 describe the policy that the Municipality is phasing-in over a four-year period, for the balance of the employees. This includes all employees from the former Municipalities of Port Elizabeth, Uitenhage, Despatch and Western District Council. However, the Uitenhage employees are already on the highest level, since this was their LSB policy prior to their transfer.

The purpose of the amendment of the SALGBC LSB policy is to harmonise the conditions of employment, as it relates to the LSB, across all of the Metro employees.

The bonuses are paid on a monthly basis and also apply to an employee's 13th cheque.

Table 2: Long Service Bonus for levels of past service (phase-in, year two: 01 July 2017 to 30 June 2018)

Completed Service (in years)	Uitenhage	Port Elizabeth	Despatch	Western District Council		SA Local Government Bargaining Council

Non-Current Portion of Liability	655 019 000	594 890 848

Key Assumptions

Key Financial Assumptions

The assumptions used are based on statistics and market data as at 30 June 2018 and 2019. These valuation assumptions are consistent with the requirements of GRAP 25.

Assumption	Valuation 30 June 2019	Valuation 30 June 2020
Discount rate	8.01%	8.02%
Future inflation	4.82%	3.48%
Salary inflation	5.82%	4.48%
Net Discount Rate	2.07%	3.38%

Detailed Assumptions

Discount Rate Assumption:

The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on Government bonds. The cash flow weighted duration of the liabilities is approximately 6.0 years. Therefore, the nominal yield curve for SA Government bonds with duration of 6.0 years, has been used, as at 30 June 2020. The resultant discount rate was 8.02%. The source of the data is the Johannesburg Stock Exchange through I-net BFA data service.

Future Inflation Assumption:

The general inflation assumption is used to estimate the base rate for determining the rate at which the future benefits will increase. We have estimated the market's pricing of inflation by comparing the yields on index-linked Government bonds and long-term Government bonds (at duration of 6.0 years). The implied inflation assumption is, therefore, 3.48% per annum.

The source of the data is the JSE through I-net BFA data service.

Future Salary Inflation Assumption:

The general inflation assumption is used to estimate the base rate for determining the rate at which the future salaries will increase. It is assumed that salary inflation will exceed general inflation by 1.0% per annum. Therefore, we have used a salary inflation assumption of 4.48% per annum for 2020.

Assumed promotional salary increase rates are as follows:

Age Band	Additional promotional scale
20 - 24	5%
25 - 29	4%
30 - 34	3%
35 - 39	2%

40 - 44	1%
45+	0%

Net Discount Rate:

The net discount rate is the gap between the discount rate and the expected increase in the salary inflation assumptions. The net discount rate is 3.38% per annum, derived from the discount rate of 8.02% and the expected salary inflation rate of 4.48%.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits (Continued)**Demographic Valuation Assumptions****Pre-Retirement Mortality:**

It has been assumed that the pre-retirement mortality will be in line with the SA85-90 light table, adjusted down for females lives, which is a table reflecting mortality experience in South Africa.

Withdrawal Rates:

Withdrawal rates have been provided for, as follows:

Age	Females	Males
20	24%	16%
30	15%	10%
40	6%	6%
50	2%	2%
55+	0%	0%

Assumed Retirement Age:

The normal retirement age is 65. It has been assumed that male employees will retire at age 63 and female employees will retire at age 58 on average, which implicitly makes an allowance for expected rates of early and ill-health retirement.

Developments since the previous valuation:

There were no changes to the rules governing payment and eligibility for the long service awards since the previous valuation. As far as assumptions are concerned, only the discount rate and inflation rate, which are dependent on the market, at the time of the valuation differed from the previous valuation. All other assumptions are broadly consistent with those used in the previous valuation, unless otherwise stated.

Plan Assets:

Management has indicated that there are currently no long-term assets set aside off-balance sheet in respect of the LSA liability.

Sensitivity Analysis

The results of the valuation are dependent on the underlying assumptions made. The assumptions represent the best estimate of future experience. The actual cost of the long service awards will however be dependent on the actual experience.

The table below illustrates the likely impact certain changes to the underlying assumptions would have on the results:

Liability: the aggregate of the current service cost and interest cost components of net periodic costs; and

Cost/(Saving): the accumulated obligation for long service awards.

Sensitivities:

Discount Rate	2020 Assumption 8.02%	1% decrease	1% decrease
		7.02%	9.02%
Liability (R'000)	695 122	737 992	656 444
Cost / Saving	42 870	-38 678	
Retirement	2020 Assumption Retire at average age	Retire at average age -1	Retire at average age +1
Liability (R'000)	695 122	631 722	759 662
Cost / Saving		-63 400	64 540

GRATUITY BENEFITS**Benefit Structure**

Employees who commenced employment prior to 01 September 1988 are eligible for Standard or Enhanced Gratuity Pensions, as follows:

Employees that were employed prior to the introduction of the PEM Pension Benefit Fund and who subsequently joined the Fund are eligible to be paid a Standard Gratuity, provided they have at least 10 years of service when they retire:

Employees that were employed prior to the introduction of the PEM Pension Benefit Fund and who chose not to join the Fund are eligible to be paid an Enhanced Gratuity for their years of service that they were not members of the Fund.

When an employee eligible for a Gratuity Pension dies in-service, half of the Gratuity Pension (including the monetary enhancement) as calculated at date of death, is paid.

Financial Valuation Assumptions

A summary of the economic assumptions that were used is given below:

Assumption	Current Valuation 30 June 201	Current Valuation 30 June 2019
Discount Rate	9.54%	9.29%
Future Inflation	6.51%	5.89%
Wage Inflation	7.51%	6.89%
Net Gap Enhanced Gratuities	1.89%	2.25%
Net Gap Standard Gratuities	0%	0%

Discount Rate Assumption:

The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on Government bonds. The cash flow weighted duration of the liabilities is approximately 6.0 years. Therefore, the nominal yield curve for SA Government bonds with duration of 10 years, has been used, as at 30 June 2018 and 2019. The resultant discount rate was 9.54% and 9.29% for 2018 and 2019, respectively.

The source of the data is the Johannesburg Stock Exchange through I-net BFA data service.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

47 Information on Post Retirement Benefits (Continued)**Future Inflation Assumption:**

The general inflation assumption is used to estimate the base rate for determining the rate at which the future benefits will increase. We have estimated the market's pricing of inflation by comparing the yields on index-linked Government bonds and long-term Government bonds (at duration of 10 years). The implied inflation assumption is, therefore, 6.51% and 5.89% per annum for the future inflation for 2018 and 2019, respectively. The source of the data is the JSE through I-net BFA data service.

Future Salary Inflation Assumption:

The general inflation assumption is used to estimate the base rate for determining the rate at which the future salaries will increase. It is assumed that salary inflation will exceed general inflation by 1.0% per annum. Therefore, we have used a salary inflation assumption of 7.51% and 6.89% per annum for 2018 and 2019, respectively.

Net Discount Rate:

The net discount rate is the gap between the discount rate and the expected increase in the salary inflation assumptions. The net discount rate (ignoring merit increases) is 1.89% and 2.25% per annum for 2018 and 2019, respectively, (derived from the discount rate of 9.54% and the expected salary inflation rate of 7.51%, for 2018 and for 2019, it was derived from a discount rate of 9.29% and the expected salary inflation rate of 6.89%).

The net gap used for the Standard Gratuity Pension is 0% since the benefit is assumed to increase by the discount rate. The Monetary Enhancement portion is assumed to remain constant until date of payment.

Demographic Valuation Assumptions**Pre-retirement mortality:**

It has been assumed that the pre-retirement mortality will be in line with the SA85-90 light table, rated down by 3 years for female members, which is a table reflecting mortality experience in South Africa.

Withdrawal Rates

Age	Females	Males
20	24%	16%
30	15%	10%
40	6%	6%
50	2%	2%
55+	0%	0%

Assumed Retirement Age:

The normal retirement age is 65 years. We have assumed that male employees will retire at age 63 and female employees will retire at age 58, which allows for the expected rates of early retirement.

Valuation Results

The Actuarial Liability was as follows at 30 June 2018 and 2019:

	30 June 2017 R'000	30 June 2018 R'000	30 June 2019 R'000
Standard Gratuity Pension Liability	10 234	10 307	9 481
Enhanced Gratuity Pension Liability	4 810	4 564	4 240
Monetary Enhancement	769	731	628
Total Accrued Liability	15 813	15 602	14 349
Balance Sheet Provision	15 813	15 602	14 349

Actuarial Gains and Losses

Disclosure of additional information relating to the costs and benefits that were paid or accrued in respect of employees during 2018 and 2019 financial years, were as follows:

Obligation	30 June 2018 R'000	30 June 2019 R'000
Obligation at beginning of the year	15 813	15 602
Interest Cost	1 237	1 408
Service Cost	207	234
Gratuity Payments	-2 406	-1 083
Actuarial (Gain) / Loss on basis	-16	-56
Actuarial (Gain) / Loss on experience	767	-1 756

Obligation at end of the year	15 602	14 349
-------------------------------	--------	--------

Projections

The projections of the expected change in the obligation over the period 30 June 2017 to 30 June 2020, is as follows:

Benefit Projection	Year Ending 30 June 2020 R'000	Year Ending 30 June 2021 R'000
Obligation at beginning of the year	14 349	10 646
Interest Cost	905	857
Service Cost	225	362
Expected Benefit Payments	-4 833	-1 785
Obligation at end of the year	10 646	10 080

47 Information on Post Retirement Benefits (Continued)

Sensitivity Analysis

The results of the valuation are dependent on the underlying assumptions made and the actual cost of the ex-gratia benefit will, however, depend on the actual experience. The tables below illustrate the likely impact certain changes to the underlying assumptions would have on the results:

Liability: the aggregate of the current service cost and interest cost components of the net periodic costs; and

Cost/(Saving): the accumulated obligation for the ex-gratia benefit obligation.

30 June 2018 Sensitivities:

	2018 Assumption 9.54%	1% decrease 8.54%	1% increase 10.54%
Discount Rate			
Liability (R'000)	16 324	15 890	15 341
Cost / (Saving) (R'000)		288	-261

30 June 2019 Sensitivities:

	2019 Assumption 9.29%	1% decrease 8.29%	1% increase 10.29%
Discount Rate			
Liability (R'000)	14 349	14 602	14 118
Cost / (Saving) (R'000)		253	-231

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

52 FINANCIAL INSTRUMENTS

Financial instruments are classified into the following categories:

Financial assets: At Amortised Cost
 Financial liabilities: At amortised cost
 Financial Assets: At Fair Value

The classification of financial instruments is determined at initial recognition based on the purpose for which the financial assets are acquired or liabilities are assumed.

The amounts relating to financial instruments reflected below approximates fair value

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
 NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

53 EXPLANATION FOR OPERATING VARIANCES: ECONOMIC ENTITY AND MUNICIPALITY

APPROVED ORIGINAL BUDGET VS APPROVED FINAL BUDGET:

In terms of GRAP 24.27 the changes between the approved original budget and approved final budget are as a consequence of reallocations within the approved original budget and the inclusion of the roll-over of unspent conditional grants as at 30 June 2019 as approved by National Treasury.

The Original Budget was approved on 30 May 2019 for the 2019/20 financial year (01 July 2019 to 30 June 2020), and the Final Budget was approved on 29 June 2020.

NMBM uses the accrual basis of accounting for its Budget.

The reconciliation of the Original approved Budget and Final Adjustment Budget and Actual amounts are shown on the face of the Statement of Financial Performance, with the reasons in variances explained below.

ACTUAL VERSUS APPROVED FINAL ADJUSTMENT BUDGET (REVENUE AND EXPENDITURE)

Explanations of Significant Variances and those greater than 10% versus Budget - The 10% threshold was considered to be the best indicator to meet performance.

1 Service Charges

Actual electricity revenue in relation to industrial consumers were less than budgeted for.

2 Interest earned - Investments

Interest increased due to strict cash flow management.

3 Interest raised - Outstanding Debtors

Interest on outstanding debt reduced as a result bad debts write-offs.

4 Licences and Permits

Due to the ad hoc nature of this income source, accurate income projections are not possible.

5 Rental of facilities and equipment

Due to under utilisation of the facilities during the financial year.

6 Income for Agency Services

Due to the ad hoc nature of this income source, accurate income projections are not possible.

7 Other Revenue

Due to the ad hoc nature of this income source, accurate income projections are not possible. There were also a major decrease in Revenue from the Stadium as a result of the COVID-19 lockdown period.

8 Transfers and Subsidies

The decrease is due to underspending of capital budget as result of COVID-19.

9 Employee Related Costs

The underspending is due to the actuarial valuation of the post retirement benefits.

10 Impairment - Receivables

Due to the increase in tariffs as a result of water restrictions, it caused the debt to increase resulting in non-payment of outstanding debt by consumers.

11 Impairment - Other

Less Traffic Fines compared to the budget was impaired than initially anticipated.

12 Transfers and Subsidies

The underspending is due to the capital portion of the MBDA grant being transferred to fund capital expenditure.

13 Contracted Services

Significant underspending on certain expenditure items due to COVID-19. Also refer note 30.1

14 Other Expenditure

Significant underspending in certain expenditure items due to COVID-19. Also refer note 30.2

15 Other Materials

Significant underspending in certain expenditure items due to COVID-19. Also refer note 30.3

16 Depreciation, Amortisation, Impairment

Refer to note 55.1 for further details.

Refer to Note 57 of the Financial Statements for explanation of variances

57 EXPLANATION FOR VARIANCES:

APPROVED ORIGINAL BUDGET VS APPROVED FINAL BUDGET:

In terms of GRAP 24.27 the changes between the approved original budget and approved final budget are as a consequence of reallocations within the approved original budget and the inclusion of the roll-over of unspent conditional grants as at 30 June 2019 as approved by National Treasury.

The Original Budget was approved on 30 May 2019 for the 2019/20 financial year (01 July 2019 to 30 June 2020), and the Final Budget was approved on 29 June 2020.

NMBM uses the accrual basis of accounting for its Budget.

The reconciliation of the Original approved Budget and Final Adjustment Budget and Actual amounts are shown on the face of the Statement of Financial Position and Statement of Cash Flows, with the reasons in variances explained below.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY
NOTES TO THE ECONOMIC ENTITY'S FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

57 EXPLANATION FOR VARIANCES CONTINUED:

APPROVED ORIGINAL BUDGET VS APPROVED FINAL BUDGET:

57.1 ACTUAL VERSUS APPROVED FINAL ADJUSTMENT BUDGET (STATEMENT OF FINANCIAL POSITION)

Explanations of Significant Variances and those greater than 10% versus Budget - The 10% threshold was considered to be the best indicator to meet performance.

1 Total Accumulated Funds

The accumulated funds variance is affected by all the other variances and their explanations are given below.

2 Non-current Provisions - Employee Benefits

These provisions are calculated by experts, of which various factors are taken into account to determine the valuation. Refer Note 47

Non-current Provisions - Other

These provisions are calculated by experts, of which various factors are taken into account to determine the valuation.

3 Current Provisions - Employee Benefits

These provisions are calculated by experts, of which various factors are taken into account to determine the valuation. Refer Note 47

4 Trade and Other Payables

Due to the underspending of the capital budget.

5 Property, Plant and Equipment (PPE)

Refer to Note 54, which gives a breakdown of the under-expenditure as a result of COVID-19, various projects

6 Intangible Assets

The budget for Intangibles Assets did not include the impairment of certain assets, which were written out of the books.

7 Investment Property

Reclassification of Investment Property to PPE.

8 Long-term Receivables

The variance is as a result of consumers defaulting during the COVID-19 period, with the billing system automatically cancelling arrangements when the consumers default.

9 Trade Receivables - Exchange Transactions and Non-Exchange Transactions

The Trade Receivables - Exchange and Non-Exchange is budgeted as one and thus included with the R2.221 billion budget.

Refer Note 15 of the AFS - there is a significant increase in residential consumer debt. Due to the increase in tariffs and also as a result of water restrictions which caused the debt to increase resulting in non-payment of outstanding debt by consumers.

10 Other Receivables - Exchange Transactions

The increase in Other Receivables is due to accruals being raised for outstanding grants not yet received from NT in the amount of R753.8 million - refer note 16 for a breakdown of the grants.

11 Call deposits and Investments

The decrease is due to less money being invested over the COVID-19 period.

12 Bank Balances and Cash

The increase is due to less funds being invested over the COVID 19 period.

57.2 ACTUAL VERSUS APPROVED FINAL ADJUSTMENT BUDGET (STATEMENT OF CASH FLOWS)

Explanations of Significant Variances and those greater than 10% versus Budget - The 10% threshold was considered to be the best indicator to meet performance.

1 Sale of goods and services, fines and taxes levied

Refer to Notes 21.1 and 23.2 in the AFS. Reduction is mainly related to the Sale of Electricity and Other Revenue.

2 Grants

The reduction is due to outstanding grants in the amount of R753.8 million not yet received from NT.

3 Interest received

Interest increased due to strict cashflow management.

4 Employee Costs

Less than anticipated.

5 Cash paid to Suppliers

Due to underspending of the Operating and Capital Budgets.

6 Purchase of Intangibles Assets, Investment Property, Heritage Assets

Due to underspending of the Capital Budget.
